# Our Ethos

## *#EVERYSECONDMATTERS*

We believe life safety work demands discipline, clarity, and accountability. Every system we design, install, inspect, test, or maintain protects people, property, and operations. Our mission is to deliver reliable fire protection through skilled craftsmanship, consistent processes, and a commitment to doing the work right, every time, without shortcuts.

Valiant is a specialized fire protection company dedicated exclusively to fire alarm and fire sprinkler systems. **We do not perform kitchen suppression, fire pump services, backflow systems, or any plumbing related work.** By maintaining a deliberate and single trade focus, we are able to deliver consistent, code compliant, and highly reliable life safety solutions. This specialization allows our teams to work with precision, uphold strict regulatory standards, and ensure every system we service is built to perform when it matters most.

# Parts and Smarts Packages

## THE SMART WAY TO WIN MORE BIDS.

Valiant Fire Company's "Parts and Smarts Package" is designed to simplify the entire process, from bid to final inspection, so you can focus on installation while we handle the technical expertise, documentation, and compliance support that ensures your project's success.

## Why Choose the Partner Smarts Package?

- ✔ Streamline complex fire alarm bidding and compliance
- ✔ Reduce project risk with expert documentation and technical guidance
- ✔ Save time with vendor prequalification and RFQ support
- ✔ Gain a trusted partner **for every phase**

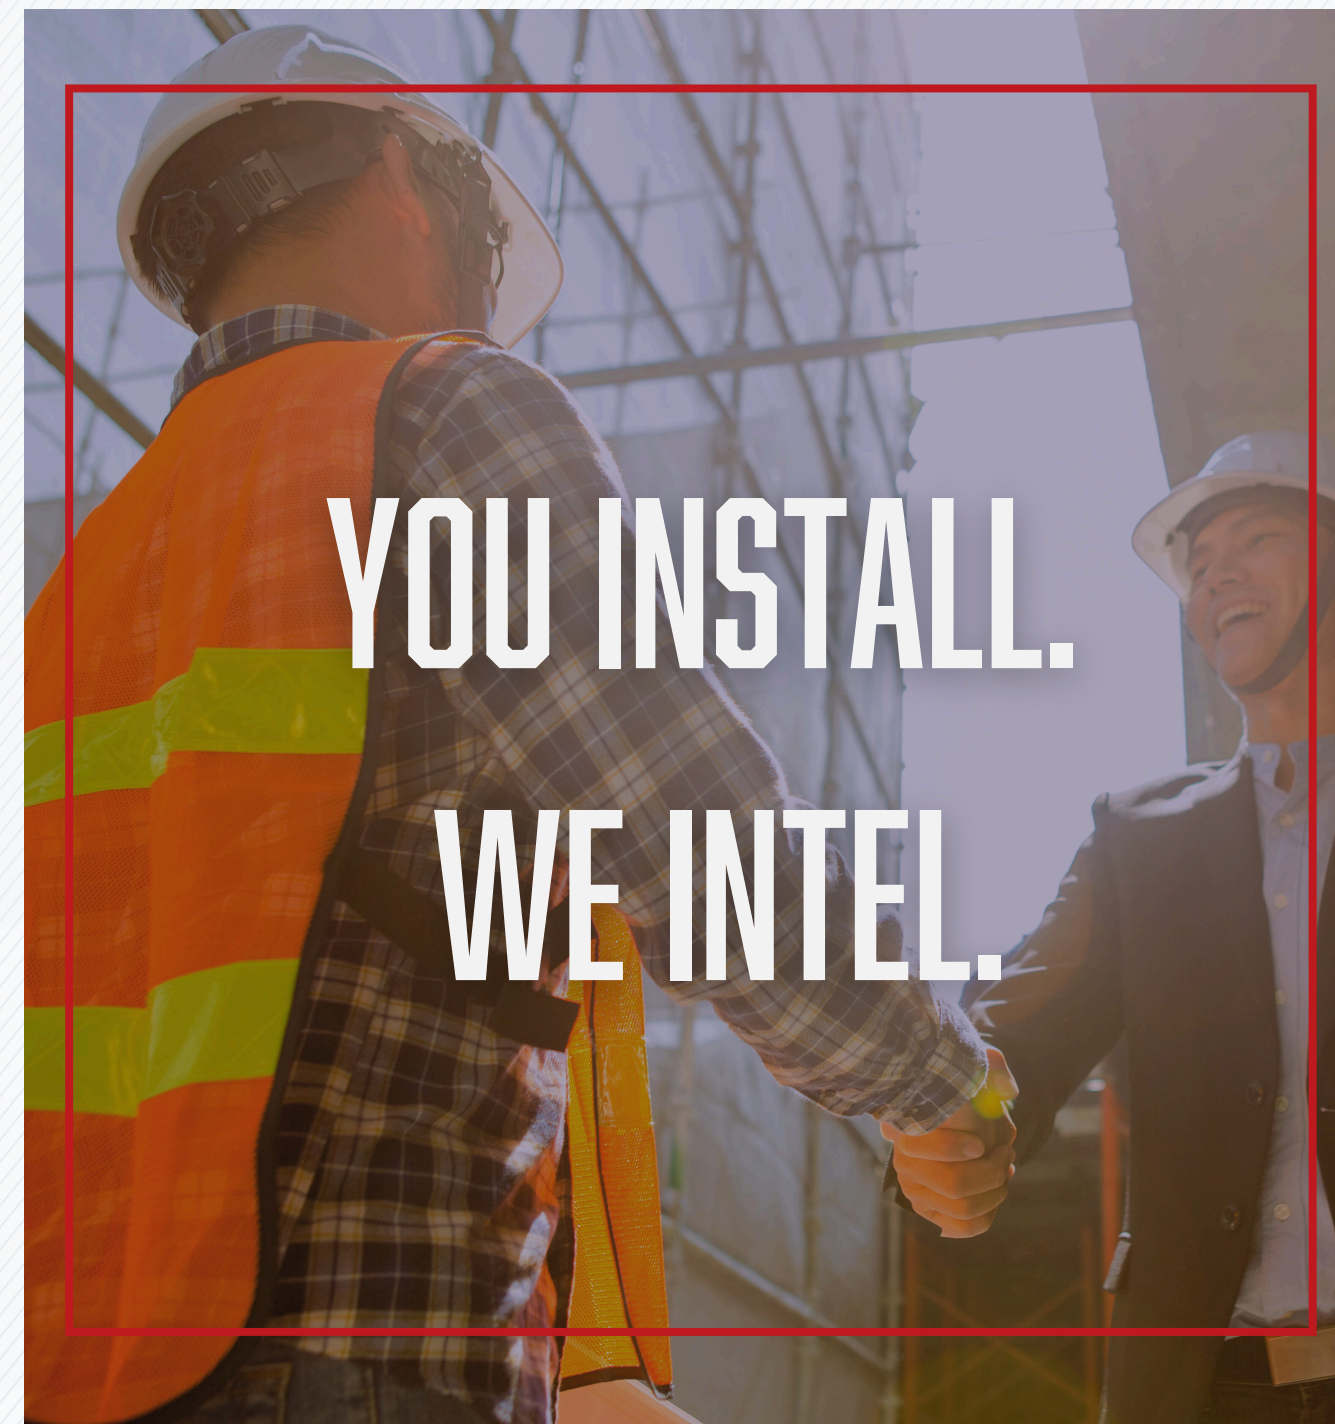

# Parts and Smarts Process

**THE SMART WAY TO WIN MORE BIDS.**

## IDEAL FOR:

- ✓ Electrical Contractors
- ✓ General Contractors
- ✓ Property Developers & Building Owners
- ✓ Low Voltage & Communications Contractors
- ✓ Public Sector Bidders
- ✓ Facility Managers
- ✓ Design-Build Teams

Our Parts and Smarts Package is **built for professionals who manage or execute construction projects involving fire alarm systems and life safety compliance.** These individuals and organizations value efficiency, reliability, and technical precision, and they recognize **the advantage of partnering with a specialized fire alarm expert** who can provide both the parts and the smarts. This package helps deliver complete, code-compliant fire alarm systems with confidence.

## DID YOU KNOW?

Siloed electrical and fire protection work on alarm installs causes 40% of MEP conflicts, triggering **\$500-\$2,000 reworks per incident**, and \$1.2B in annual false alarm response costs nationwide, plus 20-35% budget blows from non-compliance under 2025 NFPA rules.

# Parts and Smarts Process

## THE SMART WAY TO WIN MORE BIDS.

### PARTNERSHIP PREQUALIFICATION

We start by getting to know your company and your upcoming projects. Our team completes any required vendor forms or prequalification paperwork, **establishing your eligibility to bid on larger fire alarm projects.**

From there, we maintain consistent communication to strengthen our partnership and keep you informed of new opportunities.

### RFQ/RFP ASSESSMENT

WHEN YOU RECEIVE A REQUEST FOR QUOTE (RFQ) OR REQUEST FOR PROPOSAL (RFP), SEND IT OUR WAY.

**Our engineers review the plans and specifications to determine how we can best support your bid.**

**We assess each project based on factors such as:**

- ✓ Project type (new construction or renovation)
- ✓ Sector (private vs. public)
- ✓ Union vs. open shop requirements
- ✓ Scale, manpower, and scheduling demands
- ✓ Existing equipment compatibility

*If the project aligns with our expertise and resources, we proceed to the next phase.*

### DID YOU KNOW?

We are licensed dealers of Kidde equipment, **authorized to design, supply, and support fully engineered fire alarm and life safety systems**, ensuring high standards of code compliance, reliability, and manufacturer-backed performance.

# Parts and Smarts Process

## THE SMART WAY TO WIN MORE BIDS.

### INTENT TO BID & PROPOSAL DEVELOPMENT

### PROPOSAL SUBMISSION

Once we confirm project fit, we communicate our **intent to bid**, and begin a thorough analysis of the drawings and specifications.

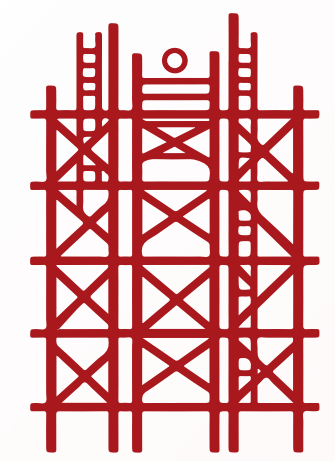

**WHAT OUR TECHNICAL TEAM DEVELOPS:**

**PROJECT PLAN OUTLINING LABOR, PHASING, AND COMPLIANCE REQUIREMENTS**

**APPLICABLE CODE AND REGULATORY REFERENCES**

**DETAILED BILL OF MATERIALS (BOM) LISTING THE FIRE ALARM EQUIPMENT WE WILL SUPPLY**

# Parts and Smarts Process

**THE SMART WAY TO WIN MORE BIDS.**

## CONTRACT AWARD & PROCUREMENT

When your bid is successful, we receive a purchase order or contract to supply and support the fire alarm system.

Our team immediately begins preparing shop drawings, placing equipment orders, and providing you with everything needed for your electrical permit application.

## INSTALLATION, INSPECTION, AND TESTING

### INSTALL & PROGRAMMING SUPPORT

Once your team installs all wiring and equipment, we step back in to:

- ✓ Verify system connections
- ✓ Power up and program the fire alarm control panel
- ✓ Conduct full system testing to confirm functionality

### FINAL INSPECTION & ACCEPTANCE TESTING

We work with your team to schedule final city inspections and acceptance testing, with a technician on-site to facilitate approval and handle any last-minute adjustments.

**THE SMART WAY TO WIN MORE BIDS.**

## PROJECT CLOSEOUT

**After successful testing and inspection, we provide complete project closeout documentation, including updated shop drawings and system records.**

*If any corrections are required, we quickly make the necessary updates until the system passes final acceptance.*

# Licenses and Certifications

All Valiant technicians are NICET certified or actively in training, ensuring every fire alarm and sprinkler system meets nationally recognized safety, testing, and code standards.

As active BOMA members, Valiant aligns certified technicians, best practices, and compliance-driven service with the expectations of professional property owners and managers.

Every technician holds the Detroit Certificate of Fitness for fire alarm and sprinkler systems, confirming compliance with strict local safety, inspection, and operational requirements.

All sprinkler fitters are BlazeMaster certified, ensuring manufacturer-approved installation methods, system integrity, and long-term fire protection reliability.

# What Our Clients Say:

" I work with similar providers all around the US and Valiant is one of my strongest performing partnerships. You provide timely service, assist with trade knowledge, and perform quality work on extensive projects. I have had to ask you to clean up jobs that other service providers have done poorly. Over-all 5 stars, great communication and wonderful work. "

**-Divisions Maintenance Group**

"We had an urgent situation getting a building prepared for a Certificate of Occupancy inspection. Valiant was very responsive and got us through a very tricky situation! We will definitely use them again!!!!"

**-Steve Kaplan**

Very responsible and knowledgeable in fire life safety. They have never let me down and always put the customer first .

**-Marrissa Wellbaum**
